Why choose NWF Sheep feeds?

Profitable sheep farming requires effective nutrition which is key to healthy, prolific ewes and fast growing lambs.

- A range of feeds to complement a wide variety of forages and suitable for all systems
- Quality ingredients to ensure high performance
- Full sheep and lamb mineral packages
- Specifications closely monitored to ensure consistent and highly palatable feeds
- Manufactured at UFAS registered production sites with full traceability and quality assurance
- Exceptional levels of service and technical advice

AGRICULTURE

NWF Agriculture is a national supplier of high quality dairy, beef and sheep feeds to UK farmers. Whatever your farming system we can meet your needs for compound feeds, blends and straights.

All our feeds are backed by our extensive technical services to ensure stock perform to their potential. Our sales team provide expert advice and solutions to help farm businesses. We also supply forage additives, grass and forage seeds, calf and lamb milk replacers, minerals and a range of specialist feeds.

NWF Ewe Feeds

The NWF Agriculture range of ewe compounds are formulated to optimise ewe production, milk yield, and sheep health.

Champion Ewe

- A high energy density feed specifically formulated to meet ewe requirements and promote colostrum quality
- Raw materials including protected fat and high quality by-pass protein are carefully selected to ensure optimal quality
- Available as a 6mm nut

Classic Ewe

- Our tried and tested high energy feed as 6mm nut
- Balanced energy and protein sources ensure a steady, even flow of nutrients to the ewe throughout a 24 hour feeding cycle
- Available from Wixland & Wardle only

Ewetrition Rolls

- A high energy density feed specifically formulated to meet ewe requirements and promote colostrum quality
- High quality ingredients providing a balanced source of rumen energy and protein promoting rumen stability and health
- Available as a 12mm roll/nugget

Winter Ewe

- A cost effective ewe diet
- Ideal for all classes of ewe
- Available as both a 6mm nut and 12mm roll
- Available from Longtown only

Prime Ewe

- A good quality ewe diet
- Balanced in energy and protein
- Cost effective designed to promote milk yield
- Available as a 12mm roll/nugget
- Available from Wixland only

NWF Lamb Feeds

NWF Agriculture lamb diets are designed to optimise lamb growth rates and health by combining the correct levels of energy and protein sources with the appropriate inclusion of minerals and vitamins.

Our lamb feeds have added vitamins B1 and B12 which aid in the prevention of disease and promote good growth rates. Ammonium chloride is also included to help in the prevention of urinary calculi.

All our lamb feeds contain an added flavour designed to increase palatability and boost intakes.

Fast Lamb

- A high quality, energy dense starter diet
- Contains a balance of energy and protein sources to boost live weight gain
- Enables early marketing of lambs
- Available as a 4mm pellet

Super Lamb

- Promotes a good, fast finish on store lambs allowing flexibility in marketing
- Can be fed ad lib with straw or restricted in conjunction with forage
- Available as a 6mm nut

Prime Lamb 14

- A palatable cost effective lamb diet
- Suitable for housed or grazing lambs
- Available from Wardle and Longtown only

Vitamins and Minerals

NWF ewe minerals are included as standard in all ewe feeds and are specifically formulated to provide optimal vitamin and mineral levels to meet the demands of pregnant ewes, to maximise lamb growth, survival and promote ewe health. The ewe minerals are also available to be included in blends.

Deficiencies can lead to increased lamb mortality, poor milk yield and colostrum quality, reduced lamb growth, sub-optimal immune status and increased mastitis and lameness in the ewe.

Optimin (R) SeY (organic Selenium) along with Vitamin B1 and high levels of Vitamin E form part of an advanced mineral specification to maximise levels of colostrum and increase immunity for healthy and strong lambs.
