

Molassed Sugarbeet Shreds

Description

A high digestible fibre and sugar energy, palatable feed supplied as shreds that afford physical structure to a ration.

Molassed Sugar Beet Shreds are a co-product from sugar production. Once the sugar has been diffused out from the beet, the fibrous residues are combined with molasses and dried as shreds.

Nutritional Benefit

Can stimulate intake, assist in optimising rumen pH and increase ration energy density without increasing risk of acidosis, which assists with maintaining animal health and milk butter fat.

Features

- Presented as dried shreds
- A highly palatable feed
- Good levels of non-starch digestible fibre energy
- High content of digestible fibre
- Articulated lorries normally carry around 18 tonnes due to product density
- Also available in 20kg bags
