

Soya Hulls

Description

Extremely rich in digestible fibre, Soya Hulls are excellent for maintaining rumen conditions and an ideal substitute for sugar beet feeds, when the price ratio encourages this.

Soya Beans are normally dehulled prior to crushing and the resulting hulls are either sold as a meal or pelleted.

Nutritional Benefit

A good source of digestible fibre, with average protein and reasonable energy levels.

Features

- A rich source of digestible fibre
- Good levels of non-starch digestible fibre energy
- Extremely high content of digestible fibre
