

# Why choose NWF Sheep feeds?

## Profitable sheep farming requires effective nutrition which is key to healthy, prolific ewes and fast growing lambs.

- NWF offer a range of feeds to complement a wide variety of forages and suitable for all systems
- Quality ingredients to ensure high performance
- Full sheep and lamb mineral packages
- Specifications closely monitored to ensure consistent and highly palatable feeds
- Manufactured at UFAS registered production sites with full traceability and quality assurance
- Exceptional levels of service and technical advice

## Blends

### The use of blends can offer significant benefits when looking to feed flocks a nutritionally balanced, cost-effective diet, while reducing the overall feeding costs.

- Only one feed to store
- One product to mix in the diet
- Better consistency of feeding
- Reduced cost of putting feed in front of stock
- Time and labour saving
- Accurate inclusion of minerals etc, in the blend

We can formulate specific blends for flocks making use of a wide variety of top quality raw materials, along with lamb, ram and ewe coarse mixes.

## NWF Agriculture is a national supplier of high quality dairy, beef and sheep feeds to UK farmers. Whatever your farming system we can meet your needs for compound feeds, blends and straights.

All our feeds are backed by our extensive technical services to ensure livestock perform to their potential. Our sales team provide expert advice and solutions to help farm businesses. We also supply forage additives, grass and forage seeds, calf and lamb milk replacers, minerals and molasses.

## Sheep Feeds

For healthy ewes and fast growing lambs

## NWF Ewe Feeds

**The NWF range of ewe compounds is formulated to optimise ewe production, milk yield and sheep health.**

Raw materials are carefully selected to include a range of starch sources to allow a balanced and safe digestion along with digestible fibre to promote rumen health. A range of protein sources has been used including soya, distillers along with Ultra Pro-R and Ultra Soy from the NWF protected feed range. This high-quality by-pass protein ensures optimal MPB levels to promote lamb birth weights, milk production and milk quality, which promotes high DLWG, healthy and fast-growing lambs. The comprehensive range of ewe compounds has a feed to suit all systems and forage types which provides the confidence that NWF have a compound for your flock requirements.

### Champion Ewe Nuts (WM, WI)

A high energy density feed specifically formulated to meet ewe requirements and promote colostrum quality.

### Classic Ewe Nuts (WM, WI)

Balanced energy and protein sources ensure a steady, even flow of nutrients to the ewe throughout a 24 hour feeding cycle.

### Ewetrition 19 Rolls (WM, WI)

A high energy, high MPB feed formulated to meet ewe requirements.

### Premium Ewe Nuts (WM, WI)

A cost effective ewe diet that is ideal for all classes of ewe.

### Prime Ewe Rolls (WM, WI)

A cost effective quality ewe diet, balanced in energy and protein.

### 2 Good Nuts & Rolls (LT)

Top quality 19% protein feed that promotes milk yield and colostrum quality.

## NWF Lamb Feeds

**The extensive range of NWF lamb compound feeds are all formulated to the highest specification using quality raw materials, carefully selected depending on the compound and its intended use.**

NWF high starch lamb diets are formulated from a range of starch sources to enable a controlled degradability which promotes a good, fast finish on store lambs. Within the range, there are high quality, energy dense, lamb starter diets which include balanced starch, fibre and quality protein sources such as our protected Ultra Pro-R which promotes high levels of MPB for young growing lambs.

NWF can supply a range of protein levels depending on your farm system, lamb type and marketing goals which gives you the confidence we have a compound to suit your needs.

NWF lamb feeds include vitamins B1 and B12 which aid in the prevention of disease and promote good growth rates. Ammonium chloride is also included to help in the prevention of urinary calculi. A flavour is added to diets designed to increase palatability and boost intake.

### Fast Lamb Pellets (WM, WI, LT)

A high quality, energy dense starter diet.

### Spring Lamb Pellets (WM)

17% protein barley based diet.

### Super Lamb Nuts (WM, WI)

15% protein high starch based compound.

### Prime Lamb Nuts (WM)

13% protein barley based finishing diet.

### Vital Rearer All Rounder Nuts (WM)

18% protein diet that is suitable for a range of systems.

### Lakeland Lamb Pellets (LT)

Carefully formulated 17% protein compound.

### Delta Lamb Nuts (LT)

15% protein high starch based compound.

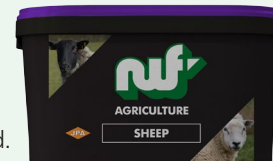

### Superstock 16 and 18 Nuts (LT)

High inclusion levels of barley, suitable for a wide range of systems and applications.

## NWF Minerals

### NWF Ewe Breeder

High quality protein and energy, ideal for ewes, rams and lambs all year round.

### NWF High Mag

Three sources of highly accessible magnesium to help reduce the risk of staggers (Hypomagnesemia) in lactating sheep.

### NWF Protein Energy

High quality protein and energy feed tub, suitable for grazing sheep providing excellent source of energy from sugars, starch and protected fat.

Available in 20kg and 80kg buckets.

## Milkivit Energized Lamb Milk Replacer

Milkivit Energized Lamb Milk has been designed to help lambs achieve their full growth potential. Energized Lamb Milk is a precisely formulated lamb milk replacer containing specially selected milk products, highly digestible oils and proteins plus vitamins and minerals to satisfy the requirements of fast-growing lambs. It is available in skimmed milk (50%) or whey-based options.
