

# Why choose NWF Suckler Feeds?

Nutrition, health and genetics all play a part in a suckler herd's productivity and profitability. Feeding sucklers requires careful management to promote performance throughout the season whilst optimising fertility.

Where possible, feed costs can be managed by utilising grass and other home-grown feeds, though a balanced diet must be provided to optimise cow health and performance.

**NWF Agriculture supply a range of suckler feeds along with associated products including:**

- Suckler Compounds and Blends
- Rumen Paks
- Techmix Fresh Cow YMCP
- Techmix Rumen Yeast Caps
- Yeast
- Acid Buff
- NWF OptiRumen
- Molasses

**NWF Agriculture is a national supplier of high quality dairy, beef and sheep feeds to UK farmers. Whatever your farming system we can meet your needs for compound feeds, blends and straights.**

All our feeds are backed by our extensive technical services to ensure livestock perform to their potential. Our sales team provide expert advice and solutions to help farm businesses. We also supply forage additives, grass and forage seeds, milk replacers, minerals and a range of specialist feeds.

## Beef Feeds

**For healthy, high grading and high performing cattle**

**Profitable beef production depends on maximising growth rates and feed efficiencies to ensure the animal is fit for the desired market.**

## NWF Starter Feeds

The pre-weaning phase is the most efficient period of an animal's life where their feed to growth conversion is at its highest. Getting calves off to the best possible start is fundamental to promote a healthy and productive beef animal.

### NWF Calf Pellets

- A high quality starter pellet which is suitable from birth until weaning.
- A high energy, palatable feed formulated to promote early intakes and rumen development.
- Contains NWF Progress Plus, a comprehensive mineral and additive package.

### NWF Calf Milk Replacers

- Formulated to provide outstanding nutrition using only quality, traceable ingredients.
- Carefully selected milk solids with maximum nutritional value and balanced blends of vegetable fats and oils, homogenised and emulsified for maximum digestibility.
- Contains a full supplement of vitamins, minerals and trace elements.

## NWF Rearer, Grower and Finisher Feeds

Whatever your production system, NWF Agriculture has a wide range of feeds to help maximise animal performance.

### NWF Vital Rearer Nuts

A cost-effective rearing nut to complement a straw or silage-based diet. Available in a variety of protein percentages.

### NWF Fusion Rearer Nuts and Super Rearer Nuts

A specialist 18% or 16% rearer diet balanced, without soya and soya derivatives. Balanced using NWF Ultra Pro-R to maintain by-pass protein levels and a high growth rate post weaning. The diet will complement a straw or silage-based diet.

### Super Grower

A balanced 15% protein diet suitable for both growing and finishing, especially in early maturing breeds where a higher protein and slightly lower starch is needed for finishing. Available from all sites (with yeast from LT and WM).

### Pedigree Beef

An intensive beef finisher diet, high in barley to help promote growth. Available from LT and WM.

### Intensive Beef

An intensive beef finisher diet, high in barley to help promote growth. Intensive Beef is available with and without yeast. Available from WI.

### Goldstar Beef Plus

A 14% protein, high energy maize based finisher diet containing yeast. Available from WI.

### Beef Concentrate

A urea-based concentrate designed to be mixed with cereal on farm at 3:1 or 4:1 to meet the desired protein for animals over 3 months of age. Contains triple minerals and yeast.

LT - Longtown Mill | WM - Wardle Mill | WI - Wixland Mill

## NWF Beef Blends

In addition to our range of standard beef blends, NWF can supply a bespoke blend to suit your system.

### NWF Standard Blends

- Cattle Rearer
- Beef Grower B2
- Beef Finisher B1
- Amino Mix 34

### Maximising rumen health

NWF offer a wide range of additives to help aid rumen health:

- **Yea-Sacc**; a live yeast which can help increase average DLWG and killing out %.
- **Opti-Rumen**; a specialised blend of essential oils and spices which can help reduce emissions through healthier, more efficient cattle (through reduced enteric fermentation).
- **Acid Buf**; inclusions in beef diets can increase average daily gain and improve conversion efficiency.

System	Animal (age, breed)	Forage Type	NWF Feed
Growing	Dairy breed (B&W)	Straw	Super Rearer 16 Vital Rearer 16
	Continental steers	Grass silage	Super Grower Super Rearer
	Continental heifers	Grass silage	Super Grower Super Rearer
Finishing	Dairy breed (B&W)	Straw	Gold Star 14 Pedigree Beef
	Continental steers	Grass silage	Gold Star 14 Pedigree Beef
	Continental heifers	Grass silage	Gold Star 14 Pedigree Beef

*NB. Super Grower can be used as a finishing/grower diets for steers and heifers if only wanting one product.*
